Rocket Steel Buildings, in Pittsburgh, Pennsylvania, is a premier provider of metal buildings and steel building kits for horse barns, metal garages, steel barns and others. The company offers quality clear span steel buildings and arch metal building kits designed, engineered and manufactured in North America to meet and exceed the highest building standards. Rocket Steel Buildings uses only 100% environmentally friendly steel that is formed into a prefabricated siding at our factory. These buildings are shipped pre-fabricated, so they take nearly no time at all to install and construct! These all-steel metal buildings are suitable for garages, workshops, farm buildings, commercial or industrial building projects.
