Fresh Air Technologies, LLC is a company specialized in mold and moisture intrusion in Matthews, North Carolina. The company offers builders and construction professionals the opportunity to have one call for waterproofing & drainage, crawlspace floor grading, and sealed crawlspace installation. Every mold removal project is carefully planned with written protocols prepared for every job. The health and safety of the homes' occupants are of utmost importance to us. Fresh Air Technologies will provide a report detailing all of the findings, including information and images identifying the source of any present issues. It will highlight the best approaches to resolving any current condition problems. The company's website highlights a full list of residential and commercial services, locations, and customer testimonials.
