Ferry Electric Company is a full-service electrical contractor in western Pennsylvania, with its offices in Pittsburgh. Since 1926, the company has served the commercial, institutional, and light industrial construction markets, installing and servicing electrical, power, lighting, voice, data, fire alarm, backup power, renewable energy, and related systems in both new and existing buildings. The company's history, affiliations, qualifications, and recognitions are highlighted on its website, which includes information about LEED, green construction, renewable energy, and new energy sources.
