Wasatch Digital Media, Inc. offers Construction Cost Estimator, an application to help contractors quickly estimate construction costs. Save time and money by quickly creating cost estimates on your iPhone, iPad, or Mac. Based in Ogden, Utah, the product is available for a Mac computer or Apple iOS, allowing it to be used on an iPhone, iPad, or Mac computer. The Construction Cost Estimator will enable contractors to add cost items and quantities and then send a professional PDF estimate to the client. The mobile app allows this to be accomplished on-site. Four different Craftsman Costbooks may be purchased within the application, containing localized cost breakdowns for everyday construction items within the United States and Canada, or a custom costbook may be created. For support questions, please use the form on the Support page on the company website.
