QuietRock noise-reducing drywall is the easiest, most reliable, and lowest-cost solution for high acoustic design / soundproofing requirements, delivering STC of 46-80 walls. Since 2002, QuietRock has been installed in over 40,000 projects, including multifamily, hospitality, medical, military, government, and education building types and facilities. All PABCO® and QuietRock® products are manufactured from natural gypsum ore. QuietRock is manufactured in the USA at our plant in Newark, California. The complete line of QuietRock Soundproofing Drywall is available across the U.S.
