The American Concrete Institute (ACI) is a non-profit technical society and standard developing organization headquartered in Farmington Hills, Michigan. ACI is a leading authority and resource worldwide for developing and distributing consensus-based standards, technical resources, educational programs, and proven expertise for individuals and organizations involved in concrete design, construction, and materials, who share a commitment to pursuing the best use of concrete. ACI produces hundreds of documents dedicated to improving the design, construction, maintenance, and repair of concrete and masonry structures. ACI documents are developed in numerous types and formats. ACI produces two bi-monthly technical journals - the ACI Materials Journal and the ACI Structural Journal. Edited for professional and technical personnel in engineering, construction, design, research, manufacturing, and education, each journal contains technical, archival papers. Journal subscriptions are available, as are individual articles from each journal.
