Wayne Brothers, Inc. is a concrete construction company headquartered in Davidson, NC, with regional offices in Summerville, SC. Wayne Brothers offers a turnkey concrete construction process that works for projects of all sizes. The company offers industrial maintenance, concrete placing and finishing and Ductilcrete slab-on-grade solutions. Wayne Brothers also provides civil and infrastructure services as well as energy infrastructure services. Using a combination of these services, Wayne Brothers can offer combined site development that provides one team of experts for all aspects of concrete constructions, from the initial planning to the foundations and slaps all the way through final construction. Wayne Brothers clients receive their models through the company's proprietary Wayne Brothers Information Modeling (WBIM) program. The WBIM program uses an innovative 5D modeling approach that takes traditional three-dimensional modeling and adds time as well as cost and quantities vectors to provide an accurate picture of what the project will require to complete. Its services are described in detail on the company's web site, and completed projects are highlighted.
